T1. Design a web page that has the following content:

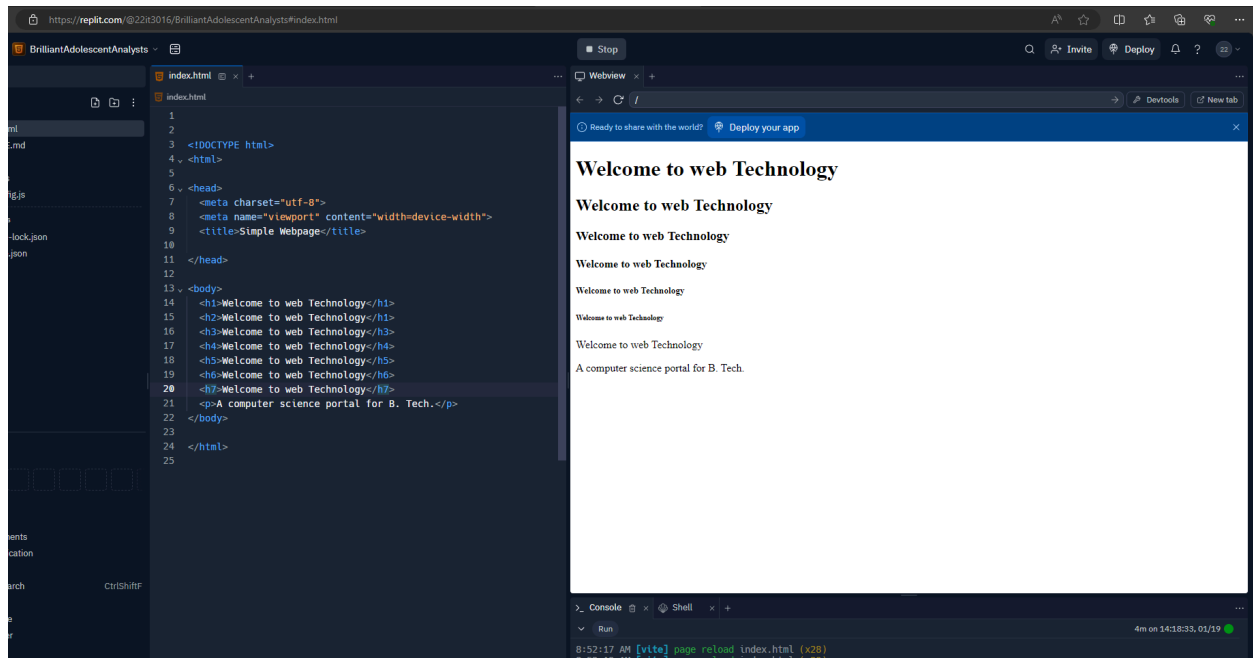

Title: Simple Web Page

Heading: Welcome to Web Technology

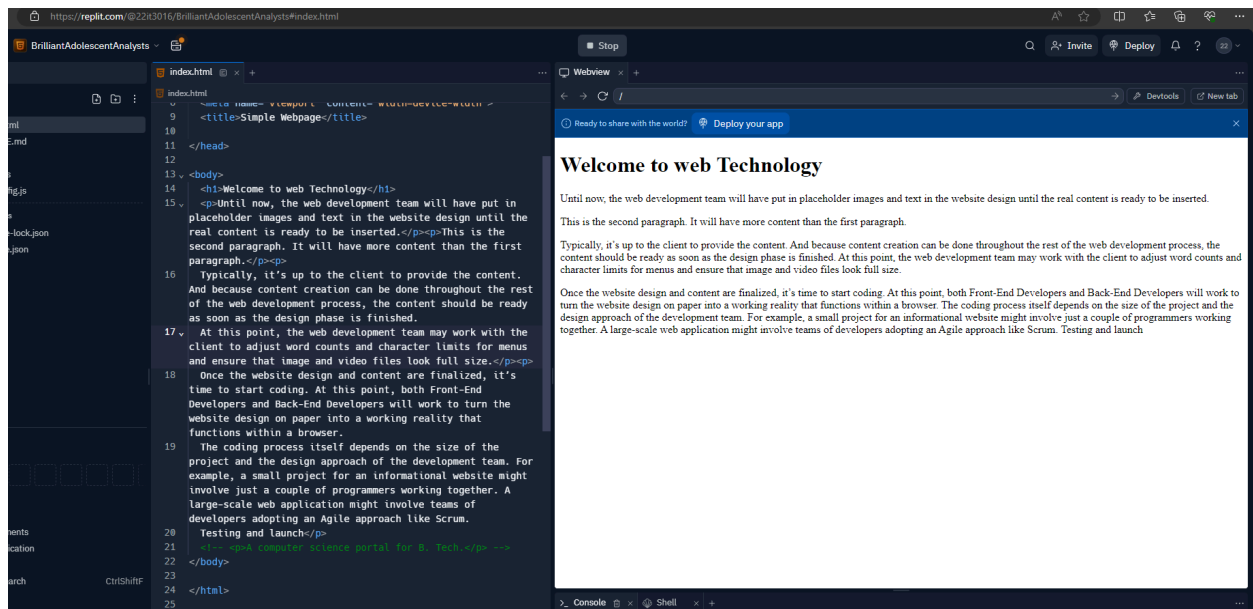

Paragraph: A computer science portal for B. Tech.

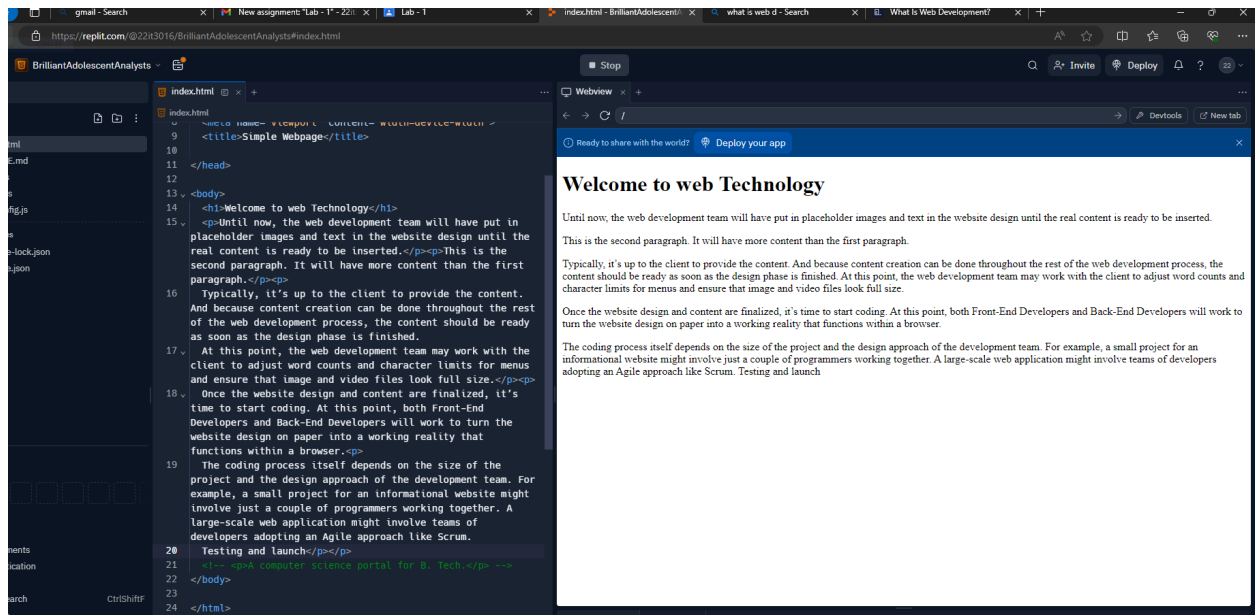

T2. For task T1, try with 7 different levels of heading.

T3. Create a html document with multiple paragraphs within the body. The content should be multiline for at least one of the paragraphs.

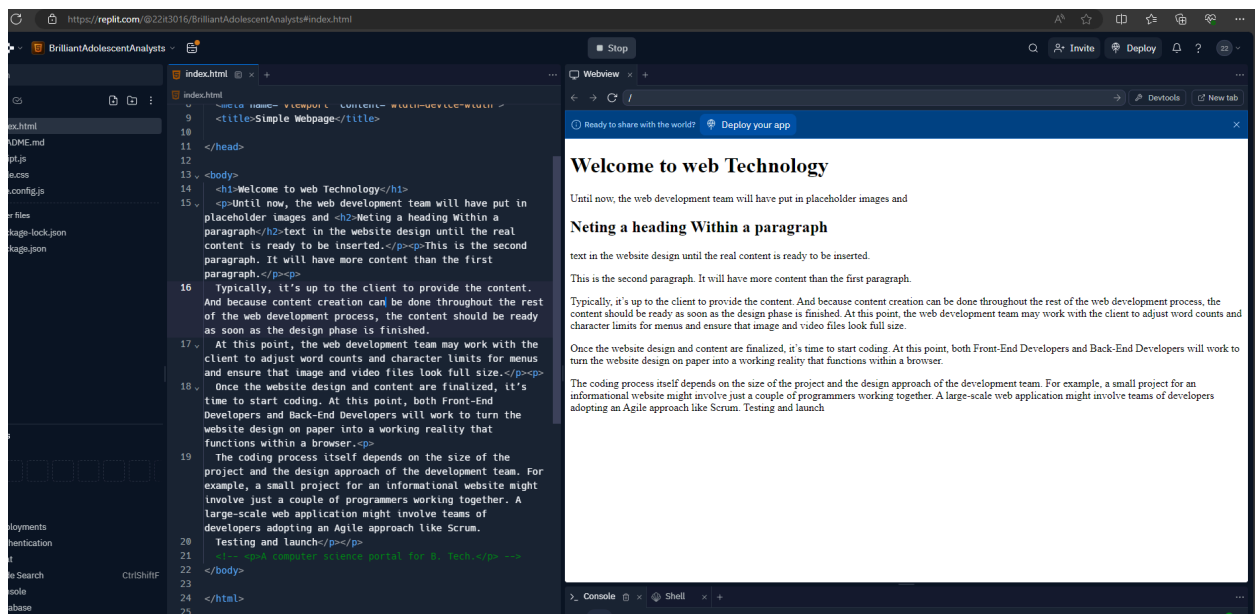

T4. Nest one paragraph within another.

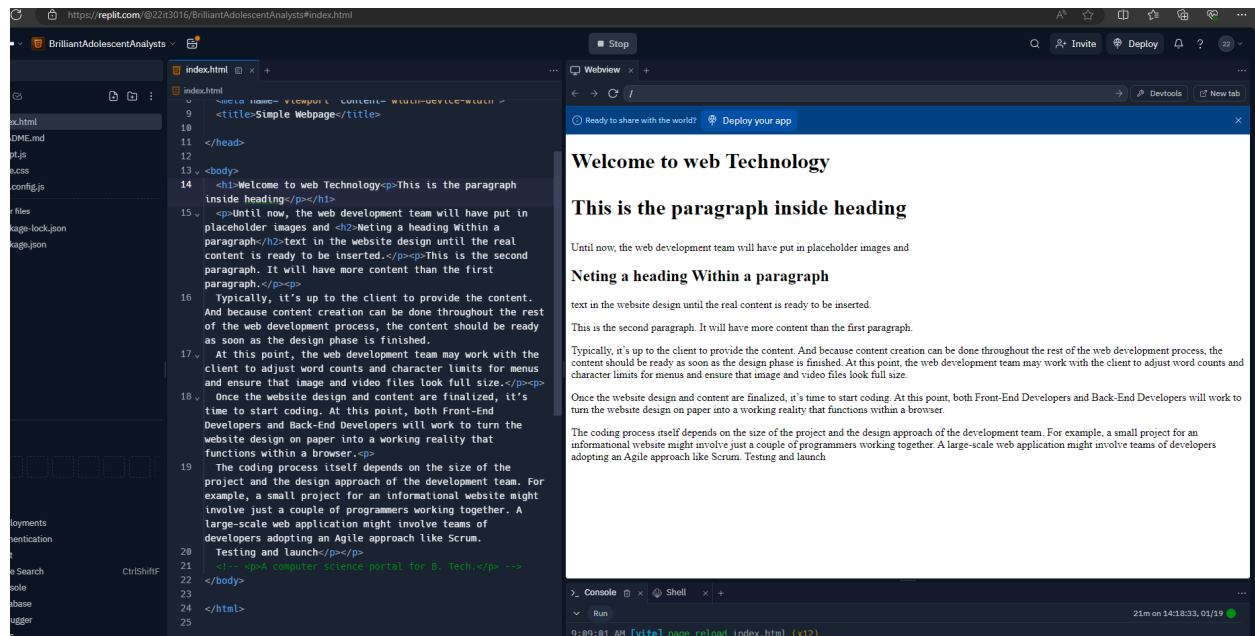

The screenshot shows a Replit IDE with a file explorer on the left containing files like index.html, style.css, and config.js. The main editor displays the code for index.html, which includes a title 'Simple Webpage' and several paragraphs of text. The browser preview on the right shows the rendered output, where the paragraphs are nested within each other, creating a visual hierarchy. The first paragraph is the largest, followed by a smaller one, and then a third one that is even smaller, illustrating the nesting of paragraphs.

T5. Nest a heading within a paragraph.
